

# AGES

A framework for thinking about how to reach and retain the adult learner

## BASIC TENETS:

### A ATTENTION

Get and keep an adult student's attention through engaging, interactive content in a variety of modalities-but with a predictable navigation structure

### G GENERATION

Enable opportunities to allow adult learners to make connections and associations--this takes advantage of how our nuero-biology creates memories

### E EMOTION

Emotion plays a huge part in brain-based learning. Use stories, case studies and ample opportunities for adult learners to connect their life-stories with content concepts.

### S SPACING

Space content in smaller chunks, with the opportunity to rest and/or reflect. Also design ample opportunity to practice repetition and retrieval (in application of concepts).

## ANDROGOGY AND ELEARNING
